THE FOUNDATION OF COMMUNICATION

Often in the investment world, identifying a long-term business trend is easy, but finding the right stock to capitalize on that trend is much more challenging. Fortunately, for microcap investors looking to take advantage of the rapidly expanding need for cellular network capacity, the choice is straightforward. By owning shares in a cellular tower company, investors can benefit from this trend, and there is only one such stock in North America: Tower One Wireless (TOWTF:OTC)

TOWERS BUILT

The Company focuses solely on a Build-to-Suit ("BTS") strategy for Mobile Network Operators ("MNOs") in the regions it serves. This strategy involves securing a long-term site lease before construction begins, ensuring attractive contractual returns.
